DOE Headquarters Report at  
GLAST Science Working Group Meeting  
2 April 01 in Baltimore

- DOE budget rollout expected April 9<sup>th</sup>
- GLAST budget to SLAC for FY02 fixed and safe
- DOE(Lehman)/NASA review in mid-February: The report finished and going thru JOG – out to public soon.
- The next quarterly review led by DOE is scheduled for August – exact date not set yet.
- The GLAST/LAT collaboration has asked for the DOE-Baseline/NASA-PDR to be held in October. This could be done, but DOE still needs to lead the quarterly review in August.
- Status of DOE/NASA Implementing Agreement:  
We've agreed to sign it if we can understand what it's saying. Last few go-arounds we've asked for clarifications from Nasa lawyers and it's come back with sections removed and new one added...
- There are 7 Memorandums of Agreement between SLAC & collaborating institutions in process
- Level 1 requirements: We've agreed with the requirements as stated in the Flight Proposal (11/99) – basically the experimental proposal – need to make sure everything in agreements references back to proposal
